## Choose HumanaDental benefits

### Be healthy

Good dental health is a reflection of good overall health. For example, the Academy of General Dentistry says there is a link between gum disease and heart problems, and the American Academy of Periodontology says severe gum disease can increase blood sugar, thereby increasing the risk among diabetics. The State of Texas Dental Choice Plan focuses on prevention, providing two exams and cleanings per calendar year.

### Be financially savvy

Your dentist can often detect medical issues before they become severe. The State of Texas Dental Choice Plan offers you a long list of covered services to take care of your health and your pocketbook.

### Be successful

Did you know that 74 percent of adult Americans believe an unattractive smile could hurt a person's chances for career success? That's according to the American Academy of Cosmetic Dentistry. The State of Texas Dental Choice Plan helps you maintain a healthy smile.

### My Dental IQ

My Dental IQ promotes routine dental care—not only to improve good oral health, but possibly to help to reduce total health care costs over time. Research shows that periodontal (gum) disease can cause or aggravate health problems elsewhere. The dental health risk assessment at [MyDentalIQ.com](http://MyDentalIQ.com) takes minutes to complete, and immediately delivers a scorecard with health tips tailored to you.
