Limitations for Orthodontic Services

In addition to the exclusions and limitations listed in the certificate, the following applies to orthodontic services:

If the dependent was covered under a prior orthodontic plan and the coverage terminated on the day immediately before the effective date under this plan, benefits are payable up to the lesser of:

1. the benefits that would have been payable for orthodontic services under the prior orthodontic plan, reduced by any amount actually paid by the prior plan; or
2. the benefits payable for orthodontic services under this plan.

You and the dependent must remain eligible under this plan during the remaining portion of the orthodontic treatment.

There is a 12 month waiting period that must be satisfied with this plan prior to having orthodontic benefits available. This waiting period may be waived under certain circumstances if the dependent had orthodontic coverage under the prior plan.

Prior plan for this provision means the member’s previous dental plan which was in effect the day before the member’s effective date under this plan and is being replaced by this plan.
